

SUSTAINABLE PACKAGING & LOGISTICS

A Closer Look at Extera's **Services**

**Repair & Replace
Recycling
Leasing Program
Compounding**

Partnering for a **Better Future**

Businesses today need more than just packaging solutions—they need a strategy that drives efficiency, sustainability, and long-term savings. At Extera, [we provide services](#) that go beyond the basics, helping companies reduce waste, extend the lifespan of reusable packaging, and improve supply chain performance. Our solutions focus on making your business stronger, more cost-effective, and ready for the future.

Whether you're looking to lease reusable containers to reduce upfront costs, repair and replace aging assets, or implement a comprehensive recycling program, we have the right solution for you. Our flexible leasing programs help businesses scale their operations seamlessly, while our repair and recycling services ensure that no container goes to waste—maximizing value while minimizing environmental impact.

Services That Work for You

Repair & Replacement: Keeping Your Containers in Use

Keep your reusable packaging in top condition with Extera's repair and replacement services. Send in your [damaged bulk containers](#), and our team will inspect, clean, and repair them to restore full functionality. If a container is beyond repair, you'll receive a credit toward future purchases, ensuring you get the most value from your investment.

Additionally, businesses looking to save on costs can purchase [refurbished containers](#) that meet the same high-quality standards as new ones. Every used container undergoes rigorous inspection and repair before being shipped, offering a budget-friendly, sustainable alternative to new purchases.

- Professionally inspected, cleaned, and repaired for extended use
- Reduce costs by refurbishing rather than replacing containers
- Ensure compliance with industry standards through rigorous quality control
- Containers beyond repair are responsibly recycled

Recycling: Closing the Loop on Plastics

Extera is a full-service plastics [recycling and toll grinding](#) company. We purchase post-industrial plastics on the open market and sell the regrind back to various industries. Through these practices, we can ensure that plastics are properly reused, repaired, and recycled. This optimizes their life cycle and keeps them out of landfills.

- Toll grinding services to process HDPE, PP, and other common industrial plastics into reusable raw materials for new products
- Helping businesses optimize scrap management programs and reduce landfill waste
- Buying and selling plastic material while providing customized recycling solutions for various industries
- Providing recycling reports and certificates to support sustainability compliance initiatives

Services That Work for **You**

Container Leasing Program: Flexible & Scalable Solutions

Extera's [leasing program](#) provides a low-risk way to integrate reusable containers into your operations without large upfront investments. Whether your business needs containers for seasonal demands, short-term projects, or long-term use, our leasing solutions ensure you have the right containers when and where you need them. Leasing eliminates the hassle of long-term ownership, allowing businesses to scale efficiently while maintaining predictable costs.

Our leased containers are inspected and maintained to the highest standards, ensuring optimal performance and longevity. Plus, we offer flexible lease terms so businesses can adjust their container usage as operational needs evolve.

- Flexible leasing options for changing business needs
- Reduce overhead costs while maintaining access to high-quality reusable containers
- Ready-to-ship inventory ensures quick fulfillment

Compounding: Maximizing the Value of Recycled Materials

Extera takes recycling a step further with in-house compounding, refining regrind into high-quality raw materials ready for use in new manufacturing processes. This vertical integration allows us to keep materials in circulation longer, reducing waste and optimizing the value of recycled plastics.

By handling compounding in-house, we eliminate the need to send materials elsewhere, reducing transportation emissions and improving efficiency. This approach not only enhances sustainability but also ensures that our partners receive consistent, high-quality materials for their production needs.

- Refining regrind into reusable raw materials for diverse applications
- Supporting vertical integration to maximize resource efficiency
- Reducing transportation emissions by keeping processes in-house
- Expanding sustainability efforts by reusing materials on a larger scale

Why Extera?

The Advantage of Partnering with Us

Partnering with Extera means gaining more than just packaging solutions—you gain a trusted ally in optimizing your logistics, reducing waste, and cutting costs. If your operations are relying on inefficient, disposable packaging, you could be missing out on savings and sustainability benefits that directly impact your bottom line. Choosing the right sustainability partner is crucial to staying competitive, and we are here to help you take that next step forward.

Achieve Your Sustainability Needs:

Reduce waste, increase reusability, and support a closed-loop economy while helping your business meet [sustainability initiatives](#) and requirements.

Customizable Packaging Solutions:

Our [bulk container lids](#) are made in-house from recycled materials. We also offer custom dunnage to meet your unique operational needs. Whether you require specialized container sizes, protective inserts, or branded packaging, our team is ready to help.

Operational Efficiency & Cost Reduction:

Optimize logistics with durable, reusable packaging that extends product lifespans, reduces handling inefficiencies, and eliminates unnecessary waste.

Fast Turnaround & Reliable Supply:

With a minimum of one truckload of each standard container in stock, we offer an industry-leading 72-hour shipping turnaround. [Need a quote?](#) We'll have it to you the same day, ensuring your order—whether 10 or 100 items—is a priority.

Industry Expertise:

Backed by [years of experience](#), we understand the complexities of supply chain logistics, packaging durability, and cost-saving initiatives. Our team works with businesses across industries to implement smarter, more efficient solutions that optimize workflows and reduce environmental impact.

TAKE THE NEXT STEP WITH EXTERA

Your Success is **Our Priority**

No matter your container service needs, we have the expertise to support your business. Whether you're looking to repair and replace containers, recycle materials, or explore leasing options, our team is ready to help.
